

Arumloa

- WHEN NATURE CALLS -

Problem Statement

Sanitation Inequality (2.1m in SA with no access)

Scarcity of water throughout South Africa

**Toilet flushing represents up to
50% of household water consumption**

Affordability of using 6 - 9 litres of water every flush

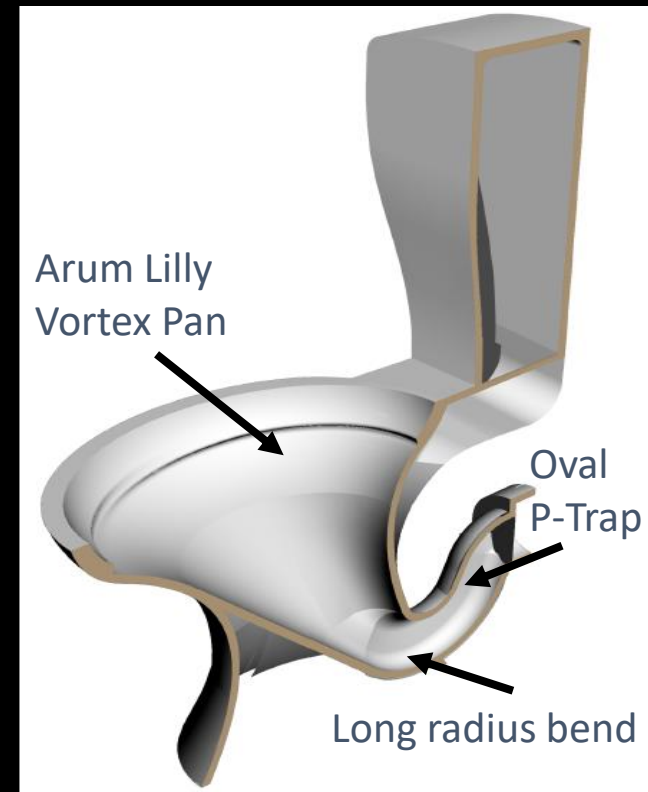

Nature Design Standard Vortex

Arumloo Features

- ◀2L Flushes on **less than 2 litres** of water
- 🏆 **Superior quality** toilet in ceramic or plastic
- ✔️ Flush with confidence (good performance)
- 👌 Flush with peace of mind (not wasting water)
- 🦋 Beautiful design **inspired by nature**
- 🌿 The **'greenest'** flush toilet on the market
- 💰 Affordable & Cost saving
- 🔧 Complies with standard plumbing fittings

International Patent No. WO2016/063257 A1

Dual Flush

Market Strategy

RIPPLE EFFECT . . . SAVING MORE WATER EVERY YEAR

Performance

~ WHEN NATURE CALLS ~

What the experts say

“Your new loo idea is quite excellent and long overdue, and taking a model from nature makes it all the more satisfying. Nature gets it right every time.”

Peter Morgan

Sanitation expert & original designer of the VIP Latrine

*“There is a big need for an effective P-Trap Design to sell to the **Japanese and European Market.**”*

Brett Solomon

Executive Director, Grohe Dawn Watertech Holdings

*“Of all my years of installing toilets in **Australia**, I have not seen anything as efficient as the Arumloo.”*

Glenn Howard, Master plumbers, Australia

Doulaye Kone,

Deputy Director, Bill and Melinda Gates Foundation, USA
